

# ISTIYAK AHMED NABIL

Software Engineer | Full-Stack (Django & React) | AI/ML | AWS & Docker  
Dhaka, Bangladesh | +880-1303039186 | [istiaknabil.dev@gmail.com](mailto:istiaknabil.dev@gmail.com) | [github.com/IstiakNabil](https://github.com/IstiakNabil) | [linkedin.com/in/istiak-ahmed-341513216](https://linkedin.com/in/istiak-ahmed-341513216)

## SUMMARY

Final-year Computer Science and Engineering student with hands-on experience in full-stack development, software engineering, machine learning, and cloud deployment. Skilled in building scalable web applications, AI-driven models, RESTful API development, and database management using Python, Django, React, PyTorch, PostgreSQL, and AWS. Experienced in delivering production-ready platforms and collaborative research solutions.

## EXPERIENCE

**Web Developer** October 2026 – Present  
*Tiffin bd*

- Maintain and optimize the official company website, resolving technical bugs and streamlining performance to significantly reduce page load times.
- Develop and implement new application features, improving overall system functionality and elevating end-user retention.

**UI/UX Intern - Remote** August 2026 – Present  
*eutropia-it*

- Conduct comprehensive UI/UX user research to identify interface pain points and analyze user behavior across primary business workflows.
- Formulate detailed analytical reports based on research findings, guiding collaborative design decisions in Figma to enhance usability and task completion rates.

**Technical Director and Co-founder** January 2026 – Present  
*Alignedge*

- Direct technical operations, overseeing the end-to-end development and deployment of client websites and full-stack applications.
- Architect and build scalable production platforms for clients, successfully delivering major e-commerce projects like Loomino and Luxiso to support robust transaction volumes and active user growth.

## PROJECTS

**Luxiso — E-Commerce Platform & Custom POS System** August 2026 – September 2026  
*React, Django, PostgreSQL, Docker, AWS* [luxiso.com](https://luxiso.com) · [github.com/IstiakNabil/Luxiso](https://github.com/IstiakNabil/Luxiso)

- Deployed a rebranded e-commerce platform on AWS EC2 via Docker Compose, secured with HTTPS via Certbot.
- Built a custom multi-location POS integrated with the storefront through a shared stock pool that dynamically decrements inventory across all sales channels.

**Fabric Anomaly Detection — AI/ML Research Project** February 2026 – Present  
*Python, PyTorch, Machine Learning, Computer Vision*

- Research and develop a conformal risk-controlled cascade pipeline model designed to accurately detect and classify manufacturing defects in fabric.
- Apply advanced machine learning techniques to improve the reliability, precision, and efficiency of automated quality control systems.

**Loomino — Production E-Commerce Platform** March 2026 – May 2026  
*React, Django, PostgreSQL, AWS* [loominobd.com](https://loominobd.com) · [github.com/IstiakNabil](https://github.com/IstiakNabil)

- Architected and deployed a production e-commerce platform: 9 storefront pages plus a 12-screen React admin panel wired to Django REST endpoints.
- Deployed to AWS EC2 with PostgreSQL, Unicorn, and Nginx; translated Figma specs into pixel-accurate, responsive React interfaces.

## TECHNICAL SKILLS

- **Languages:** JavaScript, Python, C++, Java, SQL, HTML/CSS, OOP
- **Frontend:** React, Vite, Tailwind CSS, Bootstrap, responsive design, Figma-to-code implementation
- **Backend:** Django, Django REST Framework, REST API design, authentication & session management
- **Database:** PostgreSQL, MySQL, schema design, query optimization
- **Machine Learning:** NumPy, PyTorch fundamentals, CNNs, KNN, supervised learning, computer vision
- **Deployment & DevOps:** AWS EC2, Docker, Kubernetes, Nginx, Unicorn, systemd, Linux (Ubuntu), Git/GitHub, Hostinger

## EDUCATION

**B.Sc. in Computer Science and Engineering** Expected Dec 2026  
University of Asia Pacific, Dhaka CGPA: 3.79 / 4.00  
**Awards:** Vice-Chancellor's Award (1×) · Dean's Award (3×) for academic excellence

## ACHIEVEMENTS & LEADERSHIP

- **ICPC Regional Contestant & Active AtCoder Participant** — solved complex algorithmic problems in C++ under strict time constraints.
- **President, Math Club (CSE), UAP** — led academic workshops, problem-solving sessions, and departmental programming initiatives.
